THE UNITED ANCIENT ORDER OF DRUIDS.

The Order is perhaps the oldest. History speaks of it as an Order of Priests and learned men among the ancient Celts—the race of people who left the parent hive in Asia at a very early period and settled in western Europe. For many centuries preceding the Christian era and at the time of the invasion of the Romans, the Druids was the most prominent and powerful order; they presided over the religious celebrations, and were the judges, legislators, philosophers, physicians and instructors of their people. The order first assumed its present character in England in the year 1771, and was introduced into America in the year 1830. It is a moral, social and beneficial society. Its principles and teachings are derived from ancient Druidism and are founded on reason and sound morality; they do not conflict with any religious system and are perfectly compatible with the laws of any civilized country. In becoming Druids, members are still free men. It is a secret society simply for the protection against abuse of its beneficial provisions.

The order is firmly established in all countries inhabited by the Caucasian race, and is the only order that has an International Grand Lodge which meets in quinquennial session.

Its objects are: To unite men (irrespective of nation, tongue or creed) for mutual protection, to cultivate social virtues, to encourage in business, to assist in obtaining employment, to foster among

STREET AND AVENUE GUIDE

OF THE

CITY AND COUNTY OF SAN FRANCISCO

COMPILED FROM OFFICIAL SOURCES

EXPLANATIONS

According to the method adopted in this city for numbering buildings, Market Street is the starting point for numbers on all streets running from it in a northerly, southerly or westerly direction, and the water front for all streets running therefrom in a westerly or southwesterly direction. The numbers on all streets not commencing at Market Street or the water front run in conformity with the numbers of the main streets running parallel with them, except in the case of a few streets which are numbered in an irregular manner.

On all streets between the water front and Central Avenue the even numbers are on the right-hand side, and the odd numbers on the left, starting from the point of beginning. Beyond Central Avenue most of the streets have been numbered in a contrary manner. One hundred numbers, or as many thereof as are necessary, are allotted to each block bounded by main streets; for instance, Montgomery Street commences at Market, and the main streets crossing as you proceed north are Sutter, Bush, Pine, etc. Therefore any numbers between 1 and 100 will be found on the right or left-hand side of the street between Market and Sutter, between 100 and 200 from Sutter to Bush, between 200 and 300 from Bush to Pine.

In the streets which are numbered, a dash (——) indicates that the cross street does not extend to that side; (o), the street borders on the bay, or public park, cemetery, etc., consequently there are no buildings on blocks thus designated; (c), the street is not opened through the block, or is interrupted in its course at that point by a public square, cemetery, etc.; (e), end of street.

ABBREVIATIONS.—N, north; E, east; S, south; W, west; Av, avenue; bet, between; nr, near; s, side.
